CANINE WELCOME PAGE

Welcome to Pine Animal Hospital! We are very excited that you are giving us the chance to become your partner in ensuring that your 4-legged family member lives a long, happy and healthy life.

At Pine Animal Hospital we understand that it is frustrating to be left out of decisions concerning your animal's treatment — or worse, not even know what decisions are being made. That's why we make sure you understand what we are doing and why we are doing it. After all, it is your pet that we are treating, and we view our role as your partner in achieving your animal's optimal health.

The following is a schedule for Wellness/Preventative Care that our medical staff are likely to recommend for your dog. Please review the schedule and discuss the best course of action with your veterinarian, to ensure the health and well-being of your dog.

0-8 week old Puppy:

- Puppy Exam #1
- 3 Dewormings (each separated by 2 weeks)
